

Thanos Kaloudis

Front End Developer

Hello World👋, I'm a Front End Developer based in London. I like making fun, interactive things with code. I'm passionate about building exceptional digital experiences. Currently, I am part of a gaming studio, in London. Our focus is to make modern, innovative, and fun tech solutions for the gaming industry.

Skills:

HTML CSS JavaScript

TypeScript pixi React

Jest Redux NodeJS

Phaser CI/CD

Other Interests:

Traveling to learn about other cultures, Photography, Fashion, Running, Swimming, Investments, Shares, and Funds

Work Experience

Front End Developer

June 2022 – Present at Games Global

- Developed front-end interfaces for integrating blockchain technology and NFTs into gaming applications.
- Implemented new front-end features and mechanics based on player behavior analysis, leading to increased user retention and satisfaction.
- Designed reusable UI components and templates, reducing development time for new games.

Front End Developer

Nov 2019 – May 2022 at Derivco

- Release 5 games on betway.com and other platforms across different regulated markets.
- Game flow, State management, Consume APIs, Localisation, Audio, Sprites, and Animations.
- Develop maintainable, scalable, and modular components that work across different games.
- Writing Unit Test with Jest to improve the overall quality.
- CI/CD to improve the building and deployment process.
- Being part of the whole gaming process, from Design to Release.

Junior Software Developer

Oct 2018 – Nov 2019 Chevin Fleet Solutions

- Improve functionality and add new features.
- Upgrade legacy code with a new responsive design.
- Improve software's accessibility

Education History

Alexander Technological Educational Institute of Thessaloniki

- *BEng | Automation Engineering*

Udacity
